

• Great Idea!

• Was originally worried that the game was ^{too} demanding but you mentioned that you all have previous experience so I'm really looking forward to how the game will turn out

• Interesting concept when your competition is a popular genre

• Story - multiple realities are all fighting for the same space. This would explain each person having their own level or "World" space to move through

• I think your game has great potential because you are adding a creative new spin to FPS games. If you guys pull this off in one semester I will be very impressed! Props to you!

• I think your game is very interesting and nice idea I must say. It's good that one of your team members is experienced in Unity. Creating the game with FPS controls also would be very challenging and I am very much looking forward to see the actual game. All the Best for that.

• Based on your justification I believe your game is totally doable. Looking forward to the final output.
